How many, from where and names if possible.

You are Invited to Attend a  
**Mobil Delvac**  
**Fleet Management**  
**Seminar**

You will receive valuable information from leading industry experts to help you maintain and operate your fleet properly.

**Some of the topics to be discussed are:**

- **Heavy Duty Trends:** Where have we come from and where are we headed for 2010 emissions. On and Off - Highway Equipment.
- **Diesel Engine Oil:** Emission System Impact on Diesel Engine Oils and what has changed regarding Diesel Engine Oils.
- **Recent Oil Analysis Trends:** Oil Analysis is seeing greater use due to the complexity and cost of today's engines. We will highlight some sampling basics as well as cover some of the recent oil analysis trends resulting from engine design changes and how this can save you on maintenance costs.
- **Reducing Coolant Confusion:** Cooling system issues contribute to ~40% of unit downtime. We will walk you through past and very recent changes in coolant technologies (and colors) and how your coolant options impact your bottom line.
- **Get a Grip on Grease:** Think you know grease? You might be surprised! We will go over the fundamentals and applications for grease. The myths and truths from color to high temperature.
